

ORG INTELLIGENCE & GEARSET AGENT

Fast org insight and informed changes

Give your team more control over how they plan, design, and build changes — with or without AI.

Org Intelligence — Org insights made simple

Get instant clarity into your orgs and reduce manual, time-consuming analysis so you can design the right changes and build them efficiently from the start.

Reduce risk with deep metadata analysis

- Complete dependency mapping across your metadata
- Clear impact analysis for new changes
- Full metadata search and historical change context for auditability and troubleshooting

Streamline planning with centralized insights

- Rapid org insights in a simple UI
- Quick cross-checking for fields, Flows, and automation
- Straightforward permissions breakdown

Empower your team with collaboration built in

- Avoid bottlenecks with team-wide insight
- Empower everyone with the context they needed to work independently
- Collectively optimize orgs with automatic flagging for tech debt and safely delete unused metadata.

Gearset Agent — AI your way

Go beyond static visibility and leverage proactive, plain-English guidance from Gearset Agent to make sure you're making the most effective changes.

Powerful interpretations with Salesforce-specific AI

- AI agent built on Gearset's metadata analysis expertise to help teams act confidently

Intelligent suggestions for full lifecycle support

- Suggestions on actioning changes beyond the planning and design stage

Free up time with actions for repetitive tasks

- Autogenerate summaries, descriptions, changes logs, and even code
